

Catastrophe Analyst

Who we are?

Aon Impact Forecasting is a team of scientists, developers and a client services colleagues together developing and supporting catastrophe models for various natural and man-made perils including flood, wind storm, earthquake, fire or terrorism.

Your main tasks will include:

- ▶ Work closely with Catastrophe Insight team to prepare our Cat Reports
- ▶ Global role with specific focus on EMEA and APAC that provides assistance to brokers and clients
- ▶ Aid in the development and deployment of real-time & standard catastrophe model solutions
- ▶ Develop and conduct statistical analysis to determine natural disaster loss trends
- ▶ Conduct research to strengthen Aon's historical reanalysis natural disaster loss database
- ▶ Integration of climate change research into actionable solutions for Impact Forecasting & Aon

To be able to better understand the role, simply, we are looking for a technical person with interest in above to become and grow as an expert in the field of property and motor damage caused by any type of inundation.

To apply for this offer, you should have:

- ▶ Degree in Meteorology or a related Earth Science field
 - ▶ Understanding of global weather & climate trends with an emphasis on EMEA and APAC and forecasting abilities utilizing numerical weather models and satellite data
 - ▶ Technical writing and editing skills & be able to communicate clearly in a written and verbal manner
 - ▶ Analytical skills with a background in data analysis & interpretation / delivery of statistical info
 - ▶ Prior exposure or familiarity with the insurance industry is an advantage
 - ▶ Familiarity with Microsoft Office, ArcGIS, Adobe Suite, Tableau, Google Earth
 - ▶ Applications are available for candidates with valid work permit in CZ
-

What we can offer:

- ▶ Interesting and varied role, where you can gain highly focused expertise with a significant market value and with continuous and on-going international training programme
- ▶ Opportunity to work for a market leader in the global reinsurance and insurance industry
